Overview of business development

Company-cockpit for reports

User-Definable Views

For successful corporate management, it is essential to keep an eye on important facts and figures in order to react quickly and decisively if necessary.

Here, Klaes Reports support you. With direct access to the SQL database, Klaes provides you with important figures, evaluations and KPI's. In no time you can create, for example, evaluations relating to comparisons between PP-SP, gross profit, sales or to order confirmations from your re-sellers. With Klaes Reports, you can make business decisions quickly and with confidence.

User-Definable Views:

- Structure tree by activity fields
- Freely selectable or pre-defined periods of time
- Representation as table, 2D- or 3D chart
- Trend lines (for example, difference to the previous value)
- Show/hide the labelling of coordinates
- Vertical/horizontal alignment of bar charts

Typical Reports:

- Sales-related evaluations by customers/representatives
- Document-related evaluations (for example, recorded offers)
- Evaluations against development of demand
- Evaluations of Purchase Price - Sales Price comparison
- Evaluations of gross profit
- Evaluations of average values of different documents
- Evaluations referring to the customer structure
